## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 and 20, drawn to a system for ensuring identity and traveling privileges of traveling passengers, involving identification, restrictions, and cryptography, classified in class 705, subclass 64.
- II. Claims 10-19, drawn to a system for preventing unauthorized users from acting as vehicle operators, employing a system for cutting control to the vehicle in the event of a non-authorized driver, classified in class 701, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are directed to related products. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are not obvious variants of each other. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
